Data & ML: Python Tkinter Pandas

Design: Figma Adobe XD

Tools: Git GitHub VS Code

LANGUAGES

English: Fluent

Urdu: Native

EXPERIENCE

Intern, *Baker Hughes*
03/2025 – Present | Dubai

- Contributing to front-end development tasks using HTML, CSS, and JavaScript in an agile team environment
- Participating in daily standups, code reviews, and sprint planning sessions with senior developers

PROJECTS

Rogue Shooter, *Unity 2D C# Game Development*

- Developed a 2D side-scrolling shooter game in Unity featuring enemy AI, wave spawning, and a scoring system
- Implemented player movement, collision detection, projectile physics, and animated sprite controllers in C#

Quizzy Multi-Device App, *HTML CSS JavaScript*

- Created a responsive multi-device quiz application that works seamlessly across desktop, tablet, and mobile
- Features timed questions, score tracking, category selection, and an end-of-quiz results summary screen

Roamify Travel Planning App, *Android Studio Java*

- Built an Android travel planning app allowing users to search destinations, save itineraries, and plan trips
- Integrated Google Maps API for location search and used SQLite for persistent local storage of saved trips

Movie Finder Desktop App, *Python Tkinter*

- Developed a desktop movie search and filter application using Python and Tkinter with a clean GUI interface
- Integrated with a public movie API to enable real-time search, genre filtering, and detailed movie info display

StyleSmart E-Commerce, *HTML CSS JavaScript*

- Built a fully responsive e-commerce clothing website with product listings, search, filters, and a shopping cart
- Implemented dynamic product rendering using vanilla JavaScript and local storage for cart persistence
